INTRODUCTION

ULIS- Salon Management System Simple, flexible and powerful booking software for your business for salon. Easy Salon Software is a web based management software for salons & spa. It is designed and developed to make business management efficient and effective. Broadly, it covers all management areas of salon & spa business. Easy Salon is very easy to use and affordable software that enables your clients to book appointments and pay you upfront via your website. It helps you to increase sales and manage your business more efficiently and effectively with its powerful features like inquiry followups, appointment, billing, inventory management and lot more features. Easy Salon Software gives you the confidence of managing salon and saves your time and money so that you can focus on other parts of the business like client relations and marketing that will help you to grow.

The salon / spa / beauty parlor industry is growing like never before and if you own a salon / spa / beauty parlor, then you are in the best times of servicing customers and make the cash counters ring. While the timing might be right, you'll still face stiff competition from your counterparts. You need to have some serious thinking and strategy on what keeps you special for your customers. Customers are scouting the best salon where the experience is seamless, with quality service and constant engagement. To live up to the expectations of customers you need to have a well organized approach to schedule appointments, manage customers and employees. We offer a salon management system with unprecedented ease-of-use and POS features that enhance your business management. When your clients come to their appointment at your business, they are looking for an opportunity.

BENEFITS

Reduces overhead costs

Let your salon software do the business. These meet the demand of every tech-savvy client with the help of anytime salon bookings. Thus, apart from personal booking done by phone, you can let client's book appointment on your application.

Business can monitor bookings all through a week and manage a team accordingly. You will get your client's intimation of booking and that will automate SMS from your end for confirmation.

Efficiency

Manage your business with Insight! Save time with your appointment scheduling, client and staff management, inventory, invoicing, payment processing, and more. Here are a few ways to start running your business more efficiently:

Fast and Secure

The Salon Management System is a fast and secure cloud base system.

Security

Using a spa or salon management software program will help safeguard your business. Your appointment schedule, client information, inventory count, and sales history is valuable. Keep your data safe by backing it up automatically or by storing it on the cloud. No need to worry about spilling coffee on the appointment book or about misplacing it from time to time

Organized working

When you have salon software for your salon, you can organize the entire mechanism easily. There are haphazard bookings, unhappy clients, and problematic situations. Everything becomes more systematic when you take the help of information technology.

To go a step ahead in terms of your salon life, you should incorporate personalised software for your company. It allows you to make the mechanism very easy and quick.
