

SENTENCE

Sentence is defined as group of words that expresses a complete thought.

Example

- Abuja is the capital of Nigeria
- Man is social animal by nature
- Honesty is the best policy

Sentence are classified and described into two (2) different ways:

Functional type of sentence

Structural type of sentence

- i. Functional type of sentence: They express the meaning they convey through statement question, command and exclamation (declarative, interrogative, imperative, explanatory and optative)
- ii. Structural type of sentence: They are the internal parts that make up a sentence by its structure - simple, compound, complex and compound complex sentence.

FUNCTIONAL TYPES OF SENTENCE

- i. Declarative sentence
- ii. Interrogative sentence
- iii. Imperative sentence
- iv. Exclamatory sentence
- v. Optative sentence

DECLARATIVE SENTENCE

These are sentence that states or make declarative that is they state fact and they are also called **ASSERTIVE SENTENCE** for example:

- i. She was attracted to an open air job
- ii. Nigeria needs divine intervention
- iii. Black women are more beautiful than white women
- iv. The earth moves round the sun
- v. Accra is the capital of Ghana
- vi. Yoruba is spoken in western Nigeria
- vii. The museum is built by Lagos state
- viii. Chinua Achebe is a Nigerian writer

INTERROGATIVE SENTENCE

A sentence that ask questions. For instance:

- i. Do you have a personal computer?
- ii. Have you written your assignment?
- iii. Will the state government pay the new wage bill?
- iv. What do you want?
- v. Do you want English?
- vi. Have you ever been to America?
- vii. Did you post the letter?
- viii. When do you return to Abuja?
- ix. Where did you go yesterday?

IMPERATIVE SENTENCES

An imperative sentence is a sentence that expresses a command, a request an entreaty or suggestion.

(a) Command

- i. Sit down!
- ii. Open the door!
- iii. Do not travel!
- iv. Stop there!
- v. Come here!
- vi. Bring the book tomorrow
- vii. Be regular to your classes
- viii. Close the door!
- ix. Don't smoke in the room

(b) Request

- i. Please post the letter
- ii. Can you lend me fifty naira?
- iii. May I use your phone?
- iv. Could you wait for me outside?

(c) Suggestion

- i. You should help the poor.
- ii. You must apply for a job.
- iii. You had better consult a physician.
- iv. What about a cup of tea?
- v. What about seeing a film this evening?
- vi. How about starting a small scale business?

EXCLAMATORY SENTENCES

These are sentences that express strong or sudden feeling. For example:

- i. God forbid!
- ii. Good heavens!
- iii. What a beauty!
- iv. What a shame!
- v. What a great success!
- vi. How brilliant Victoria is!
- vii. How happily they are living!
- viii. How difficult the question paper is!

OPTATIVE SENTENCES

Optative sentence is a sentence that expresses a wish, probability or supposition. For example:

- i. I wish you were my wife.
- ii. If I had wings, I would fly.
- iii. May God help you in your attempt
- iv. If Helen had been my friend, I would have been happier
- v. She ought to have been married by now.
- vi. We wish she would be with us.

STRUCTURAL PARTS OF A SENTENCE

- i. Simple sentence
- ii. Compound sentence
- iii. Complex sentence
- iv. Compound complex sentence

SIMPLE SENTENCE

Simple sentence is the sentence in its simplest form. It contains only one subject and one predicate and can therefore make one only one complete and independent assertion. Examples:

Birds fly

The teacher bought pens, pencils, rulers and notebooks.
Fuel dealers deliberately ration

The sales of duel

We ate the food

The baby is hungry

He wept

The girl screamed

My father is a lawyer

The woman screamed hysterically.

A simple sentence performs one of four functions in English:

- i. It makes statement
 - ii. It ask question
 - iii. It gives a command or makes request and
 - iv. It makes an exclamation
- The hunter killed a snake (statement)
Can you see me tomorrow (question)
Get out of this class (command)
Please pass me some salt (request)
Oh! Funso has broken the pot (exclamation)

THE COMPOUND SENTENCE

A compound sentence is one which consists of three or more simple sentences joined together by a coordinating conjunction or semicolon. All the clauses that make up the compound sentence are of equal grammatical rank. For example:

- The seven world leaders came, they saw, but they did not conquer.
- Peter Rufai arrived in Nigeria last February; he played some matches for the national team, but he was not a success.
- We are in the classroom and we are studying English language.
- I will pay your fees beside the pocket money you will be given.
- I warned her but she will not listen.
- My father invited me and gave me some money/clothes.
- I greeted the man but he did not answer me.
- You can see me now or you can see me after meeting.

THE COMPLEX SENTENCE

A complex sentence consists of two parts: the main clause (the clause which can stand on its own) and one or more subordinate clauses (clauses which depend on a main clause for their full meanings) Examples:

- i. If you disturb me, // I will send to bed.
- ii. Even though her father is rich // and in spite of her noble heritage, // Ifeoma steals.
- iii. The man who came here yesterday is a friend
- iv. Here is the car which my wife bought
- v. If you want, I will teach you

THE COMPOUND COMPLEX SENTENCE

The compound complex sentence consists of two or more main clauses and one or more subordinate clauses. Examples:

- i. Before I opened the bureau // I was a social worker, // but I was frustrated because I always wanted to do more for my clients than I could.
- ii. Since Enneka married his second wife // his children have not enjoyed good health // and he has lost his peace of mind.
- iii. I love you and I want to marry you but you have to love me also because love should be reciprocal.

PARTS OF A SENTENCE

Every sentence has two main parts i.e a sentence is made up of a subject and predicate. The subject contains a noun or a pronoun and the predicate contains a verb. So it can be said that the naming part is the subject and the telling part is the predicate.

THE SUBJECT

The subject is the person or thing talked about in the sentence, i.e is the main actor. The most important part of the subject is the headwork. Of all the words that make up the subject, the headwork is the only word which cannot be replaced, and it determines whether a sentence is singular plural.

THE PREDICATE

The predicate, on the other hand, comprises what is said about the subject. It is usually made up of words that belong to any of the seven parts of speech. The most important part of the predicate is the verb.

SUBJECTS

- Children
- Our examinations
- The use of language
- Drunkards
- Bukola
- He
- The sun
- Ibadan

PREDICATE

- Cry often
- Were completed on schedule
- Distinguishes human beings from animals
- Babble a lot of nonsense
- Is very beautiful
- Went to Abuja yesterday
- Rises in the east
- Is my birth place

TENSES

Tense is a form of verb that establishes relationship, event, state of being or affairs amount of time, references or speaking. In other words tense I English is the concept that is used to describe the relationship between an action or state of being to time.

There are basically three tenses in English:

- i. Present tense
- ii. Past tense and
- iii. Future tense. Any unnecessary shift from one tense to another in a single utterance or sentence should be avoided.

PRESENT TENSE

Present tense is used to denote, signify or refer to activities taking place now, always or eternal truth. e.g.

- i. I am reading my notes.
- ii. Musa is a student.
- iii. He speaks loudly.
- iv. The sun rises from the east.

Present tense is of three types, present simple, present perfect and present continues.

1. Present Simple Tense

Present simple tense is used for actions performed as a matter of habit, always and eternal truth. e.g.

1. He speaks loudly.
2. Bala is good man.
3. James goes to school late.
4. The sun rises from the east.
5. They are not helping matters.
6. Get out of my way!
7. What is your name?
8. What a mess!
9. Will you please help me with some money?
- 10 I suggest you buy the red dress.

Present simple tense performs any one of these function: declaration, imperative, exclamation, interrogation, suggestion, requests, wishes and probability (as indicated above).

Proverbs and idioms are also said in present simple tense, e.g. such in time saves time, the empty vessels make the loudest noise. At times present simple tense is also used for planned future e.g. the president leaves to London tomorrow.

2. Present Perfect Tense

This tense is used for action that are completed but not too long and have relevance in the present or future; it is also used along with HAVE or HAS plus the participle sense of the verb e.g.

- i. I have seen him.
- ii. He has seen me.
- iii. They have eaten all the food.
- iv. She has done the work.
- v. Musa has finish^{ed} his test.
- vi. The thief ~~have~~^{has} broken the door's handle.
- vii. She has done the homework.
- viii. The assignment has been completed.
- ix. We have not eaten for two days now.

3. Present Continuous Tense

This continuous tense is used for action or activities yet to be completed (that is ongoing actions) or activities. It is also used for planned actions on arranged future. E.g.

- i. He is cooking food.
- ii. They are writing the second paper.
- iii. He is lecturing.
- iv. I am going tomorrow.
- v. They are coming for celebration.

- vi. We are keeping him in custody for two days.

2. Past Tense

Past tense is generally used for actions or activities that are performed and completed in the past. Past tense, like present tense, is of three types: past simple, past perfect and past continuous tense. They are:

1. Past Simple Tense

This is used for actions or activities that took place in the past e.g.

- i. He did the assignment – yesterday.
- ii. We slept well.
- iii. He knocked him down.
- iv. They demanded money from me.

• Past simple tense is used for “**WISHING VERB**” e.g.

- i. I wish I were in your shoes.
- ii. How I wish he was not there.
- iii. We wish we gave us the money in time.

• It is also used in constructions as:

- i. It is high time I mastered English.
- ii. It is high time I went there.
- iii. It is high time he washed his clothes.

2. Past Perfect Tense

This tense is used to refer to an action or activity that took place at point in time before now and completed a long time ago. A past perfect tense is used along with **HAD** and the participle sense of the verb e.g.

- i. I had seen him before he noticed it.
- ii. We had gone there for two hours before demanded for our papers.

3. Past Continuous Tense

for two actions going on simultaneously.

This is used to indicate action (s) that started in the past and yet to be completed and it is usually accompanied with past simple tense or when two activities happened or took place in the past simultaneously while one is shorter than the other. The longer action (s) takes past continuous and "ing" sense of the verb and the shorter action takes the past simple tense e.g.

- i. I was reading when he arrived.
- ii. We were watching television when the incident happened.
- iii. I was going for my lectures when I met him.

3.Future Tense

This is used for actions or state of being that one expected to take place in the future. Future tense like the rest of the tenses is of three types: future simple, future perfect, and future continuous tense.

1. Future Simple Tense

This is used for intended action (s) e.g.

- i. Will go home tomorrow.
- ii. They will write exams next week.
- iii. She will do it herself.

2. Future Perfect Tense

This is used for action intended to be completed in the future e.g.

- i. I will have eaten my food by 9:00am
 - ii. They will have taken the exams by now tomorrow.
 - iii. We would have finished the work by next week Friday.
- Future perfect tense like the present and past perfect tenses has its verb in the participle sense e.g. eaten, taken, seen, finishes, laughed etc.

• Future Continuous Tense

This is used for planned or arranged action or activity in the future e.g.

- i. I will be sweeping my room in an hour's time.
 - ii. I will be going for lectures tomorrow
 - iii. They will be registering students as they come.
- While future simple tense is for intended actions, generally, future continuous is for planned action just as present continuous and present simple tense.

CONCORD

Concord refers to agreement between subject and verb in time, number and gender. Concord helps in uniting the major elements or components in a sentence to achieve cohesion or balance, particularly, between SUBJECT and VERB. Concord of various kinds, for instance, between SUBJECT and

- i. Subject verb concord
- ii. Pronoun concord
- iii. Notional concord and
- iv. Proximity concord

1. Subject/Verb Concord

This looks at the harmony between the subject and the verb in a sentence. The principle is that a subject must agree with the verb in number, time and gender. E.g.

1. The lecturer is in his office.
2. The lecturers are in the offices.
3. Jane and Hafsat are neighbours.
4. Habu is my neighbor.
5. Cheating in exams is on the increase.

6. John came here yesterday.
7. John comes here always.
8. Musa went to the class in the morning.
9. Musa goes to the class every time.
10. Either Bello or James is coming.
11. Neither Ahmed nor Timothy is around.

RULES:

A. If “each” or “every” is used along with two singular subjects joined by

“and” they are seen individually and so a singular verb is used. e.g.

1. Every man and woman is created by God.

2. Each male and female is relevant in this context

B. In mathematical calculations we are free to use any, either singular or plural verb, e.g.

1. Two and three is five
2. Two and three are five

C. When a compound subject is joined by or, “nor”, “either”, and “neither” the verb agrees with the nearest subject e.g.

1. Either the Governor or aides are around.
2. Either the aides or the governor is around.
3. The Governor of his commissioner are coming.
4. The commissioners or the Governor is coming.

D. When two subjects refer to the same thing the verb should be in singular e.g.

1. Rice and beans is a good meal
2. Bread and butter is a kind of meal
3. Law and order is to be maintained.

E. Period of time, amount of money, measurement of weight and distance are generally treated as singular e.g.

1. Fifteen years is too long
2. Three kilometers is long distance to travel by foot.
3. Ten Thousand Naira buys little things these days.

✱

F. In a situation where two or more subjects refer to the same person the verb remains singular. E.g.

1. Nura, my mentor and my boss is kind,
2. Mark a carpenter and mason knows his job.
3. Isa the proprietor and director general of sky power is a philanthropist.

2. Pronoun Concord

A pronoun must identify with the subject's gender e.g.

- i. Mary beat her sister three times.
- ii. John beat his brother Enoch.
- iii. The school quarters are exposed so they have to be supervised always.
- iv. The market is becoming compacted, it has to be expanded.
- v. Mary is a good student, she always goes too early.

3. National Concord

Here the agreement between the subject and the verb depends on the speaker's perception of the subject of the subject items regardless of any grammatical marks e.g. in collective nouns.

1. The family is doing well.
2. The family are doing well.
3. The community is active these days.
4. The community are active these days.

5. The team is fine.

6. The team are fine.

4. Proximity Concord

In proximity concord, attention is placed on the agreement of the verb with noun or pronoun which comes immediately before it and not all the subject e.g.

“either”, “neither”, “nor”.

1. Either the Rector or lecturers are coming.

2. Either the lectures or the Rector is coming.

Some connectives like “along with”, “with”, “as well as”, take singular verb e.g.

1. Musa along with his brother is coming.

2. Tannu with his wife is to visit us today.

3. The general manager as well as his council members is to see us at noon.

and takes plural verb

LOGIC AND LOGICAL THINKING

Definition:

1. Leilis (1975) States that logic is the science of reasoning... The process of drawing a conclusion from evidence or what one takes to be evidence.

2. Kilgore (1968) Sees logic as a critical analysis and development of the structure of reliable inference.

3. Copi (1971) Says that the study of logic is study of the method and principles used in distinguishing correct reasoning.

All those definitions suggest that logic essentially aims at explaining the difference between correct reasoning.

THE PURPOSE OF LOGIC

1. When we study logic, our abilities to reason correctly is enhanced.
2. The purpose of logic is to enable us take good and sound decisions.
3. It enables us to understand errors in reasoning by affording us the tools to analyze arguments.
4. It enables us to overcome irrational thinking, parochialism and obsession.
5. It enables us to reason in an orderly manner.

PRINCIPLES OR LOGIC

1. Argument: It refers to the attempt to bring evidence in support of a conclusion. Mayfield (1987) defines arguments as a principal of logic a body of discourse that present evidence in support of some thesis. An argument has two (2)

Components: This is the thesis argued for. In logic, conclusion is a statement made about an argument which has been supported by evidence. It is drawn or inferred the

Premise. eg. If all gold does rust but Bello's wristwatch rusts then that wristwatch is not gold.

- a. Premise: This is a statement that formulates evidence. It asserts grounds or gives reasons/evidence used in support of a conclusion. Premise is formed in such a way that it neither denies nor affirms e.g. when somebody says that: "it will soon rain", he might have notice that the sky is cloudy.
2. Proposition or assertion: This is when a statement is made without any attempt to substantiate the claim. That is anything said without a proof or evidence.

3. Opinion: It is a personal subjective judgment based on what one believes to be true or false. E.g. There are many students who are very lazy.
4. Fact: Anything that is known to be the truth is a fact. It is something that is universally accepted and very obvious to all. It is often used in support of proposition because of its reliability. A fact cannot be argued, it can only be verified or cross-checked at the primary source e.g. Mrs. Olu Teaches mathematics.
5. Assumption: This is an opinion taken to be true even though one is not sure or may not ever be sure about it. In order words, it is something that is believed without careful checking.
Inference: This is a process or reaching conclusion. It is a psychological activity of reaching an opinion from accepted evidences or premises. It is the mental process of moving from premise to conclusion.
6. Syllogism: This is a form of reasoning in which conclusion is reached from two (2) statements.

METHOD OF REASONING

1. DEDUCTIVE: Deductive logic is reasoning from the general to the particular or individual. It is an argument in which the premises do not necessarily imply or entails the conclusion. The premises rather constitute conclusive evidence for the conclusion. This deductive reasoning is the process by which we reach a specific conclusion. This deductive reasoning is the one by which we reach a specific conclusion rather than a general one. e.g.
 1. All mammals breast feed their young ones.
 1. Cows are mammals.

- ii. Therefore cows breast feed their young ones in this type of argument, conclusion is derived from the premises that are at least implied or actually stated.

2. **INDUCTIVE METHOD:** Induction is an instance of reasoning from individual or particular phenomenon to general conclusion. An inductive argument is one in which the premises do not necessarily imply the conclusion. It is the means of obtaining Knowledge of the general from Knowledge of the individual. Inductive logic therefore consists of observing and mentally organizing data and then making a generalization about the data. The reasoning process is based on experience and it implies learning experience. E.g. Mubi is in Adamawa State Adamawa State is in Nigeria, Mubi, Therefore is in Nigeria.
