Literary Terminologies

Symbolism is the use of images, structures and inferences to convey meaning and messages to conjure pictures. Stanza is a group of lines of poetry. A line of a stanza is described according to the number of feet it contains. Sonnet is a lyrical poem of fourteen (14) lines with a rhyme scheme.

Rhythm is the total flow of a passage of prose or verse which needs not to be in metre.

Rhyme is the repetition of same sounds at the end line of a poem. The rhyme produces a pattern known as rhyme-scheme.

Theme is the major thrust or main idea in a piece of art. Ideation is the central idea which envelopes any piece of art and can be religious, social, political, philosophical etc.

Diction is the choice of words in any piece of writing. This affects the meaning of what the writer intends to convey to the readers or audience.

Enjambment is also called run-on-line. It is a verse where there is no pause at the end of a line and the sense in a line is not completed but carried to the next line.

See note on logic inside

HAND I

Logical thinking deals with the evaluation of arguments. This is an attempt at distinguishing good reasoning from bad reasoning. It tells whether the reasons given are good for inferring the conclusion(s) which are established.

Reasoning is a kind of thinking that involves problem solving, arriving at inferences and ~~conclusions~~ ^{conclusion}. Inference is the process in which an assertive statement is made. At times, it is a statement that is either true or false and can be denied.

Argument provides the necessary support or grounds for the truth that is being provided - which is the conclusion. An argument can have a premise and a conclusion or more premisses for a conclusion.

Premiss or Premise is the statement on which reasoning is based. Here, Logic is a form of reasoning is divided into two - the deductive reasoning and the inductive reasoning.

Deductive reasoning involves a thinking process in which one argues from a universal or general principle or statement to a specific or particular one.

These statements can be categorised into three viz

(i) minor premise

(ii) Major premise

(iii) Conclusion

The minor premiss is a proposition made bearing in mind an attribute stated by the major premise and the conclusion made based on the relationship between the two premisses - minor and major.

The systematic form of reasoning is also called Syllogism.

Major premiss

All people bearing Mary are female
All men are mortal

Minor premiss: Jimmy is a man

Conclusion: Therefore, Jimmy is a mortal.

Hand I

Inductive reasoning is when one argues from specific or particular instances to general or universal. It is at the point of premiss the direct opposite of deductive reasoning. To come to conclusions certain evidence such as facts, examples and generalisations, occurrences and statistics are made. This generalisation is under probability. For example

Minor: One man has two legs.

The second man has two legs and the third man has two legs

Major: Therefore, one, two, three men have two legs ^{each}

Conclusion: Men have two legs.

Evidence in Logical thinking / reasoning

Evidence in logical reasoning is drawn from your experience or from authoritative writing. If an argument will be true, its evidence will be true. Therefore, to obtain a valid inference or conclusion your evidence must be supported by facts. It however, suffices to add that the point for an argument may be expressed in form of facts or opinion.

Facts are the truth or what has being verified and approved by experiment, research and observation.

Opinion is a reflection of a personal emotion and attitude based on one's experiences

Definition of Project Report

The Project Report is a report submitted in partial fulfillment of the requirements for the award of a diploma at the national or higher degree level. The submission is usually done by the student to his or her department for assessment and subsequent award of a certificate at the end of the course of study.

How do students select a topic or topics for a project report.

The project topic should ordinarily be selected by the student but there are situations where the supervisor can select the topic for the student.

① Students or Candidates' Selection of topic.

This is the situation where by the student or candidate selects the topic. This is more advantageous to the student because the student will be interested in the topic.

② He/she will be more

committed

③ The aim/objectives will

be easily achieved. ⑦

④ The statement of the problem will be clearer

⑤ The envisage cost of the project will be known before hand.

⑥ The student can easily access materials for the early completion of the project.

⑦ This creates room for enthusiasm and further study on the said topic.

Supervisor's Selection of Topic

① It is publishable at the end of the project

② It encourages serious research work on the said topic

③ It creates room for novelty

④ It gets the supervisor involved in the research or project.

⑤ It becomes work in progress for further study.

(Note)

The opposite of the above points are the disadvantages

Reference / References

This is where the researcher arranges the authors in alphabetical order. It can be APA or MLA

Bibliography

This has to do with works consulted but not quoted directly in the research.

Format of a Project

① The Preliminary Pages

① Title page

The title page contains the same information as the Cover page of the Project. It contains the Student or Candidate who submitted the title of the project. It contains the person the title is submitted to.

It contains the purpose the title is submitted for. It contains when the title was submitted.

It contains the Case Study

② Table of Contents

This Sub-section provides the topic and Sub-topics and the pages or pages they are found. It helps the reader or even the Student to locate any piece of information in the project. It is usually arranged in an orderly reflecting the content or contents of the project.

③ Certification Page

The Certification page has to do with the Statement stating or certifying the Study was carried out by the Student under the supervision of the Supervisor.

② The Student endorses this page. The Supervisor and the Head of Department also endorse this page.

④ Acknowledgement

In the acknowledgement, the Student or Candidate expresses gratitude for the Contributions of others toward the Success of the project.

All books, materials, sources, journals etc used in the project are acknowledged.

⑤ Dedication

The researcher dedicates the Study to anybody or a group of individuals.

⑥ Abstract

The abstract is the synopsis or a brief summary or a condensation of the research or project or an abridgement or a conspectus, or an overview of evidence and recommendations. This makes it easier for the reader to follow the detailed project report. The abstract provides background to the project report, the methodology used, provides the summary, findings, ~~etc~~ conclusions.

Chapter One

* Chapter one is usually made up of the following:

- Background to the Study
- Statement of the Problem
- Aim/Objectives of the project
- ^{Research question} Significance of the project
- Research hypothesis
- Limitation of the Study
- Definition of terms

1.1 Background to the Study

This section Sub Section

Provides information on known facts about the study area and introduces new areas that can facilitate further study.

1.2 Statement of the Problem

The researcher states the problem and states possible solution.

The researcher states or cites studies previously carried out and what have been left out and needs to be done.

1.3 Aim/Objectives / Research Questions

The aim/objectives state(s) the purpose of the project and what the project sets out to achieve.

1.4 Significance

The significance is the value or importance of the work to knowledge. It states the benefit of the project to the

Society, the academia, (3) etc.

1.5 Research hypothesis

This is the relationship between variables which will be tested by the study before acceptance or rejection.

1.6 Limitation of the Study

This has to do with the areas to be covered by the researcher. This helps in achieving its objective objectives and some problems or difficulties that might affect the project such as money, time, instruments etc.

1.7 Definition of terms

The researcher explains terms that might be unfamiliar or technical to the audience or reader and which can be misinterpreted.

20 Chapter two

Literature Review.

This is also better put as review of related literature.

It gives the theoretical framework of the research.

It reveals the current or novel developments in the area of study.

The pieces of information can be sourced from the libraries, internet, journals, articles etc.

Chapter three

3.0 Research Methodology

This is the method applied by the researcher to investigate, research, find out facts on a given topic, articles, etc.

3.1 Study Area

This has to do with the area covered by the researcher in the research. This affects the sampling technique.

3.2 Study Population.

This is the overall Population that will be

used for the study.

(4)

3.3 Sampling Techniques

Here the researcher gives the methods to be used for sampling. This is because the researcher cannot cover the whole area or the study population and the reason for the choice of the sampling technique should be stated.

3.4 Method of Data Collection

The method the researcher intends to use for the collection of data is given.

① Primary Sources

- questionnaires
- interview
- personal observation
- Material evidence

② Secondary Sources

- books
- Previous projects
- Journal
- internet etc

3.5 Analysis of data

It is changing raw data to coded data for further study.

Chapter Five Four

Research Result Discussion

Explain the findings in the cause of the project or research.

Quantitative research or research based on number or measurement or element or compound etc should be illustrated by means of diagrams, tables, figures etc.

The data should be interpreted with respect to the research question/hypotheses. This project should show results that differ from or conform to previous studies and how the research findings contribute to knowledge.

Chapter Five

5.0 Summary, Conclusion and Recommendations

5.1 Summary

It is the synopsis or abridged form of the project finding.

5.2 Conclusion

This conclusion is made by on the result derived from the tools administered during investigation. The conclusion leads to the recommendation.

5.3 Recommendations

These are suggestions that form part of solution to the problems that informed the commencement of the project.

The researcher can also give new areas for further research on the study area.

1 Method of Gathering Data for a Project Report

① Questionnaire

This is a set of questions that are asked or posed in order to obtain response in relation to variables identified in the objectives of the study.

Types of Questionnaire

① Open or Unstructured

These questions asked do not restrict the respondent to any of the responses. The respondent is free to provide any response in his/her desired manner.

② Close or Structured Questionnaire

These ask questions and also provide a set of answers or responses from which the respondent selects. Some items not provided in the options are tagged others at the end of the list.

② Interview

This is a one on one interview or interaction between the researcher and the respondent, which is usually in logical order free from interruptions.

③ Field forms

It is used in experimental studies similar to the questionnaire except in lay out. It is less costly.

④ Attitudinal Scale

It is used to measure variables that are non empirical. Eg

(1) I like teaching
Always shines Never

2 1 3

⑤ Observation

It is used to describe an event, a situation, process. It is also used to evaluate a training or instructional process.

Types of observation

① Structured observation

The variable, to be observed is recorded and the researcher is well informed about the subject.

② Participant observation

The researcher is part of the group throughout the time of the observation.

③ Focus Group Discussion

This is a technique of data collection from a small group carefully selected group of about 6-8 individuals to discuss issues in a free and uninhibited manner through the guide of a facilitator. It must be in the interest of the researcher and group.

Reasoning

Types of Reasoning

- 1) Deductive Reasoning
- 2) Inductive Reasoning
- 3) Analogical Reasoning

Deductive Reasoning: Drawing conclusions from general principles.

Inductive Reasoning: Drawing conclusions from specific observations.

Analogical Reasoning: Drawing conclusions from similarities between two things.

Types of Arguments

- 1) Deductive Arguments: Arguments where the conclusion follows necessarily from the premises.
- 2) Inductive Arguments: Arguments where the conclusion is probable based on the premises.
- 3) Analogical Arguments: Arguments where the conclusion is based on the similarity between two things.

Validity is how an argument is structured. An argument is valid if the conclusion follows necessarily from the premises. An argument is sound if it is valid and the premises are true. An argument is unsound if it is invalid or the premises are false.

1) Premises or Premise is the Statement on which reasoning is based.

2) Conclusion is the affirmed proposition that is based on the other propositions of the argument.

- 3) Fallacy is an error in reasoning.
- 4) Verbal fallacies - ambiguous words (him/she)
- 5) Formal fallacies - over generalisation
- 6) Material fallacies - eg. Premised you is good but all people are not good.

7) Induction - Specific to General

8) Deduction - General to Specific

9) Validity - is the use of deductive reasoning to support the truth of the conclusion.

10) Syllogism is when conclusion is reached from two statements. Eg. All fathers are men. I have a father, therefore, my father is a man. Premises: All fathers are men.

Forms or Functions of Sentences

- 1) Statement/Declarative
- 2) Question/Interrogative
- 3) Command - Imperative
- 4) Exclamation
- 5) Request (Could you do it?)
- 6) Desire or hope (I hope you can do it)

Sentence Structure

- 1) Simple
- 2) Compound (and, besides)
- 3) Complex (because)
- 4) Compound/Complex =

2 or more main clauses and one or more subordinate clauses.
Subordinating Conjunctions: in case, unless, when, where, although, if, even though, because, since, provided, as long as.

④ NOTIONAL CONCORD (Perception)

- The family is here (as an entity)
- The family are here (individuals)
- The government has failed (entity)
- The government have failed (individuals)
- The team is playing tomorrow (entity)
- The team are playing tomorrow (individuals)
- The committee is working (entity)
- The committee are working (individuals)

⑤ PROXIMITY CONCORD

Noun or pronoun which comes immediately before the verb

- Either the lecturer or the Rectors are wrong

- Either the lecturers or the Rector is wrong

- Either the men or the woman is correct.

- Either the man or the women are correct.

CONCORD

Concord in English is used to relate to harmony, agreement or cordial relationship. It means there should be agreement between the subject and the verb in English. This agreement can be achieved due to the 'proximity', 'closeness' and 'farness' of the subject and the verb.

There is a part of the sentence that must be known which is called the operative. It is very important. E.g.,
① The insults from the madman were useless.
Here the operative is insults not the 'madman'. Therefore, the subject 'insults' and the verb 'were' agreed.

TYPES OF CONCORD

- ① Subject-Verb Concord
- ② Subject-Object Concord
- ③ Pronoun Concord
- ④ Notional Concord
- ⑤ Proximity Concord

① Subject-Verb Concord

A verb should agree with its subject in number. For a singular subject, a singular verb is used. E.g.,

- The lecturer is in his office.
- The lecturers are in their offices.
- The lecturers are in his office.
- Cheating in the examination is bad.
- John and Mary are dancing.
- Mary is dancing.
- My friend and classmate is here.

- The chairman and secretary is here.
- The chairman and the secretary are here.
- Each male and female is here.
- Every male and female is here.
- Two and three is five.
- Two and three are five.
- Either Mary or James is here.
- Neither James nor Mary has come.
- Not Mary but James was invited.

Use of 'with', 'as well as', 'together with', 'as well as'.

- Our lecturer as well as the student is here.
- The lady with her child is here.
- The boy together with his cat is running.

②

Subject-Object Concord

Reflexive pronoun should match the subject, number and gender.

- Mary has taught herself a new trick.
- James bought himself a new book.
- They are paying for themselves.

③

Pronoun Concord

3rd Person (he, she, it, they, them, their,)

Indefinite Pronouns (each, anybody, everybody, nobody)

- Mary ate her food.
- Mary and John won their medals.
- Each eligible Nigerian is to vote.
- Everyone is interested in her.

TYPES OF SENTENCES

A Sentence is a group of words that make a complete sense. A Sentence has a Subject and a predicate. It must contain a finite verb. A Sentence is equivalent to a principal or independent or main clause.

A Sentence is classified into two, namely; function and structure.

Function

- ① The Declarative Sentence
- ② The Interrogative Sentence
- ③ The imperative Sentence
- ④ The exclamatory Sentence

Some scholars include 'request' making them five functions; and also Desire or hope Declarative or Statement Interrogative or Question Imperative or Command

Structural Classification of Sentence

- ① Simple Sentence
- ② Complex Sentence
- ③ Compound Sentence
- ④ Compound / Complex Sentence

The Functional Classification of Sentence

① Declarative Sentence.

The declarative sentence is a statement or a declaration. Example;

- ① He is a kind man
- ② She is a beautiful girl.

② The Interrogative Sentence.

The interrogative is a question. Eg;

- ① Where are you?
- ② Who is she?

③ The Imperative Sentence

The imperative sentence is a Command

- ① Get out of the class.
- ② Pick it up.

Often, the subject of the command is not stated but it can be supplied. Eg (You), get out of the class.

④ The Exclamatory Sentence

The exclamatory sentence is an exclamation expressing emotions such as anger, surprise, sorrow etc. It is usually introduced by 'what' or 'how' and has an exclamation mark (!) at the end.

- ① What a beautiful wife you have!
- ② How kind of you to have sent the money!

Structural Classification of Sentence

I. Simple Sentence

The Simple Sentence has a subject and a predicate. The Subject can be a noun or a predicate. ~~The~~ The Predicate can be a single finite Verb or with an object or objects.

- (i) Moses is tall.
- (ii) Moses kicked it.

II. Complex Sentence

The complex sentence comprises of a main clause and one or more subordinate clauses. Example:

- (i) The students bought the book which the lecturer recommended
- (ii) The students bought the book (M.C)

~~from the~~ which the lecturer recommended in the classroom. (C)

III. Compound Sentence

A compound sentence comprises two simple sentences joined together by a coordinating conjunction. The two sentences or clauses are equal in importance. Example:

Jamini is a doctor and his sister is a lecturer.

IV. Compound/complex Sentence

A compound-complex sentence has two main clauses and one or more subordinate clauses. Eg, The teacher bought the book and bought the shoe in the market when it rained.

④ The Present Continuous Tense OR

The Present Progressive

The Present Continuous tense is used when something is happening now. It means the action has not ended or terminated at the time of utterance. Eg

Mary is writing a conference paper.

We are reading in the lecture hall.

Usually, the 'ing' particle is added to the main verb to form its continuous or Progressive structure.

③ The Present Perfect Tense

The Present Perfect tense shows that an action has been completed in the present time (tense). The action started in the past and has just ended or completed now. This also shows that the action started and ended in the past but the result is still visible in the present. The Present Perfect tense uses the verb "to have" according to the noun or pronoun used as the subject of the sentence. For example,

Mr. Olo has gone home

The student has finished his assignment.

④ The Simple Past Tense

The simple past tense is used when we want to say or state that an action was started and completed in the past. Note that, there is no link between the past and the present.

Examples:

① HND I class left ND II last semester.

② Zandira left Mubi last month.

⑤ The Past Continuous OR

The Past Progressive

The Past continuous or the past progressive is used to show that two or more actions were going on in the past and one of the actions was left unfinished or was interrupted. The unfinished action is put into the Past Continuous and the Simple Past is used for the other action or actions.

① As Jimmy was walking home this morning, he met his lecturer.

② Shaibu was beating his son when an elderly man came around.

⑥ The Past Perfect Tense

The Past Perfect tense is used when two or more actions are accounted for. That is; one action was completed before the other or the other actions.

The completed action is put in the Past Perfect tense. The simple past tense is used for any other action or actions in the same sentence or construction. Example:

① I had finished lecturing when

Mariam came to the lecture hall.

② Joseph had gone half way before he remembered his travel-bag.

TENSES

HINDI

The linguistic term tense is regarded as "the change that takes place in the form of the verb to indicate time. Most scholars accept that there are two main tenses in the English Language - the Present and the Past. The future time (tense) is not considered a tense since it makes use of auxiliaries and the Simple Present verb form.

The various tenses

- (i) The Simple Present tense
- (ii) The Present Continuous tense or The Present Progressive tense
- (iii) The Present Perfect tense
- (iv) The Simple Past tense
- (v) The Past Continuous tense or The Past Progressive tense
- (vi) The Past Perfect tense

(vii) The future tense (time)

Modern scholars do not consider the future tense a tense because it does not have the same tense changes as in present and past forms. For example,

Present	Past
Peel	peeled

The future or the Simple future time makes use of auxiliaries and the Simple Present tense to make sense.

Sentences depicting correct use of tenses

(i) The Simple Present Tense

The Simple Present tense is used when we want to say something is done habitually. The Simple Present Tense is used to express action, idea or thought in the future.

It is therefore correct to say that a thing happens or somebody does something always, regularly, usually, often, sometimes. The Simple Present Tense is used for something that goes on all the time.

Examples:

(i) The Students receive lectures every School day.

(ii) The Sun always rises in the east

(iii) The Rector arrives tomorrow.

More explanations on the Uses of the Simple Present Time.

(i) Habitual action

The Students receive lectures every School day.

(ii) Eternal truths

The Sun always rises in the east.

(iii) To express present action or attribute

Mike has a car

(iv) To express what is fixed.

Christmas is held on 25th of December of every year.

(v) For sports commentary or other any other commentary.

Amekachi passes the ball to JJ Okocha.

(vi) To express future time.

The president arrives the Federal Polytechnic, Mubi.

a Adjective

The adjective describes or modifies

a noun or a pronoun

It can be descriptive. Eg

She is beautiful

It can be possessive. Eg

Our, his, yours, theirs

It can be demonstrative by

~~to~~ showing proximity. eg.

this, these, that, those

It is can be numerals. Eg

one, three, third, seventh, seven

It can be an article. Eg

the (definite article)

a, an (indefinite article)

The Adverb

The adverb modifies a verb, or

another adverb. Eg. Slowly, carefully,

locally. Adverb can be of time,

Reason, place, manner.

The Verb

The verb is a doing word or an

action word. Eg dance, run, jump

The Preposition

The preposition establishes the

relationship between one subject

and another or between an object

and another. Eg. to, up, under,

before, besides etc

The Conjunctions

The conjunctions join words or

clause together. Eg and, either,

or, unless, so that, nor, neither

Exclamations

(3)

Exclamations are used to

express emotions, pains, feelings -

such as ah!, oh!, Gosh! hurray!

② Functions of Noun

The noun functions in a sentence as:

- ① Subject
 - ② Object
 - ③ Complement
- Subject

① James is a lecturer

Object

① I slapped Aisha

Complement

① Aisha is married

① Bullying and John are married

Noun phrase

A noun phrase is that phrase that the main word or the head is a noun or pronoun

① Articles (a, the, an)

A boy, the man, an eagle

② Possessives (my, our etc)

my car, our house

③ Adjectives

big girls

beautiful girls (ladies)

handsome boys

Tall men / women

④ Combination of articles,

possessives and adjectives etc

① The big beautiful lady

② This mad woman

③ A fat bank account

The head in a noun phrase can be post-modified by

① The governor elect

② Something great

⑥ Prepositional phrases

- The girl from Lagos
- The lady in the house

⑦ Post modification by clauses

- Mike is a man who laughs
- Mike is the girl I warned of
- He was the one that went

Gerundial phrase is also a noun phrase functions as the subject of the verb

* Teaching is noble (Teaching subject)

* Telling lies belittles a man

⑧ Infinitives

- To speak ill of people is bad
- To slap a girl is ungentlemanly

⑧ An adjective can be head of a noun phrase

- The rich also cry
- The poor can smile
- The Stupid do not learn from experience

⑨ Object of a verb

- The teacher slapped the student
(Od = direct object)

- She bought me a plate of rice

She = Subject

bought = Verb

me = Id (indirect object)

a plate of rice (od = object direct)

⑨ Subject complement

- My wife is a soldier (S. complement)
Object complement

Parts of Speech

① Parts of speech is very important in our daily activities.

They are noun, pronoun, verb, Adjective, Adverb, Preposition, Interjection

Noun

A noun is a name of person, place, place, animal or thing, inspiration, months, ideas etc.

Place = Mubai, animal = goat,

People = James, thing = chair,

inspirations = ABU, Months = January,

Ideas = education, wisdom, Joy, beauty, wealth

Types of Nouns

Basically, nouns are divided into 2 (two)

① Proper nouns = Persons, place, Countries, months, week, Magazine (Newspapers)

The first letter usually written in Capital letter = James, Monday etc

② Common Nouns

This is a name given to a class of

Persons, places, things, ideas

Person = Michael, Girl, boy, woman, man

Places = Country, mosque, village

Things = School box, house, knife, shoes

Ideas = beauty, wisdom, reason

Animals = fowl, cattle, sheep

There are other nouns

(1) Count nouns (singular and plural)

girl - girls

man - men

woman - women

Decision - Decisions

Box - Boxes

(2) Un-Count nouns (can't be counted and have no singular form)

By = Sound, rice, water, cheese, cream, anger, music, progress, situation

③ Abstract and Collective nouns are Common nouns

(11) Abstract nouns

These relate to ideas

⑨ skill, concept, remark, idea, admission (Count nouns)

(10) anger, education, poetry, wisdom, happiness (Count nouns)

(10) Collective noun

These relate to a group of people or things. eg

Class, community, crowd, family,

Gang, flock, group, party,

The clergy, the elite, the rich,

the public, the United States

Note

* The Count noun suggests a Particular type of item

* The Un-count noun suggests a generalisation eg

① John's work is credible (Un-count)

② John's works are good (Count)

* Number = Singular / Plural

Count nouns have both Singular and plural

boy

boys

woman

goose

goose

tooth

Stadium

Man servant

Boy friend

Boy friends

* Zero plurals

deer

series

sheep

fish

species

trousers

pains

deer

series

sheep

fish

species

trousers

pains

④ Demonstrative Pronouns

Demonstrative Pronouns point out specific persons, places or things and have singular and plural forms

Singular (near)

This

these

plural (far)

that

those

⑤ Interrogative Pronouns

Interrogative Pronouns are used to in asking questions. They are who, whom, what, which, how, when etc. Eg Who stole it?
Note

Which is used when the choice to make is limited to a specific number. (may one to ten)
What is used when the choice to make is not limited to a specific number (very large number)

⑥ Relative Pronouns

Relative Pronouns link the clause to its antecedent.
Eg The man who slaughtered the

Cow is here

- The girl whom I taught is sick
Note

Most interrogative Pronouns are relative pronouns.

⑦ Indefinite Pronouns

The pronouns are not specific.

Eg Some, any, all, few, little, many, several, nothing, something, ~~none~~ no one, everyone, everything, anything

- Everybody is happy with him
- Each pupil has a bag
- Few are asked to go home

⑬ Pronouns

Pronoun is a word used instead of a noun. It is used to avoid repetition of nouns.

Types of Pronoun

① Personal Pronoun

Personal pronoun has to do with the three persons: First, Second and Third.

First Person

This is the person speaking

Second Person

This is the person spoken to

Third Person

This is the person spoken to or thing spoken about.

The first person (Subject)

I - Singular
We - plural

The first person (Object)

~~us~~ me - (Singular)
us - (plural)

The Second has these forms (Subject)

You - Singular
You - plural

The Second person (Object)

You - Singular
You - plural

The Third Person has these forms (Subject)

he, she, it (Singular)
they (plural)

(Object) him, her, it (Singular)
them (plural)

⑭ Possessive Pronoun

②

Possessive pronouns show ownership. It has two forms

- ① Pronominal adjective - my book
- ② Pure pronouns - mine

It has three persons (Singular)

First Person - my, mine

Second Person - Yours, yours

Third Person - his, her, its (Adjective form)

his, her, its (Pure pronoun)

Three Persons (plural)

First Person - Adjective form - our
Pronoun form - ours

Second person - Adjective form - Your
Pronoun form - Yours

Third Person - their (Adjective form)
their (Pronoun form)

⑮ Reflexive Pronoun

Reflexive pronoun refers to the subject of the sentence and has the ending of 'self'. Eg

I did it myself (myself refers to I)

⑯ Emphatic Pronoun

Emphatic Pronoun is used to show emphasis. Eg

I myself did it

⑰ Reciprocal Pronouns

Reciprocal pronouns are used when the action expressed by the verb is shared by those concerned. Eg

- Ali and Aisha love each other
- Grace, Meg and Lucy like one another.
