THE FEDERAL POLYTECHNIC, MUBI
SCHOOL OF HUMANITIES AND CREATIVE ARTS TECHNOLOGY
DEPARTMENT OF LANGUAGES AND COMMUNICATION
1st AND 3rd SEMESTER MAIN EXAMINATION, 2021/2022 ACADEMIC SESSION

PROGRAMMES: ALL ND II
COURSE CODE: GNS 201

TIME ALLOWED: 2hrs 30mins
COURSE TITLE: Use of English II

Instruction: Answer question one (1) and any other three (3) questions.

QUESTION ONE

- a. What is Summary?
- b. Identify any five (5) steps in summary writing.
- c. Read the following comprehension passage carefully and answer the questions that come after it.

Marriage as a human institution is facing its greatest threat ever in the twentieth century, never, since the first man and woman were joined together, has the institution been beset by as many problems as it is now. And this trend, which started in the western world, has spread and is spreading to all parts of the globe.

The most disturbing problem is the high rate of divorce. It is no longer a social stigma for women to fill in forms indicating that they are divorced; men too, proclaim their liberty from the shackles of matrimony, somehow with pride. Little wonder that young couples resort to separation and eventually divorce at the slightest disagreement.

Not less among the factors hastening the death of marriage institution is the progressively rising cost of living. Nowadays, it is essential for both partners to be gainfully employed, to be sure of a reasonably decent level of existence. The marriage ceremony itself costs so much that the young men save towards it for years. Little wonder then that many young men simply remain single, raising one or two children from ladies who themselves are often willing collaborators against the institution of marriage.

Questions:

- i. What does the author mean by referring to marriage as an institution?
- ii. What do the words 'liberty' and 'shackles' mean, as used in the passage?
- iii. Mention any two factors that are seriously threatening the marriage institution.
- iv.who themselves are often willing collaborators against the institution of marriage.
- 2. What is the grammatical term used to describe the above expression, as used in the passage?
- b. What is its function?
- v. Give one word or phrase which can replace each of the following words, as used in the passage.
- a. Globe
- b. Stigma

QUESTION TWO:

- a. With three (3) examples, define phrase.
- b. With three (3) examples, define clause.
- c. Identify the underlined phrases in the following sentences:
 - i. The man in the garden is my uncle.
 - ii. The man at the gate is my father.
 - iii. I worked twice a week.
 - iv. The beautiful girl comes here every day.
 - v. The man in the garden is my uncle.
- d. Identify the underlined clauses in the following sentences:
 - i. Whatever you do I won't leave it.

- 04
- ii. I love girls although I have none.
 - iii. The vehicle is in the garage which John bought is good.
 - iv. The student recovered his money that was stolen yesterday.
 - v. He married as if it was the solution to his problem.

QUESTION THREE:

- a. Define a sentence. ✓
- b. Identify the following sentences according to function:
 - i. Chinua Achebe was a Nigerian writer.
 - ii. When did you return from Kano?
 - iii. Don't smoke in the room!
 - iv. Oh! My God.
 - v. The teacher is good.
- c. State the structural types of the following sentences:
 - i. Jones is a good teacher.
 - ii. The teacher is teaching and the students are listening.
 - iii. I slept while she was cooking.
 - iv. Musa came in and waited for his friends until it started to rain.
 - v. James did well in his business because he started with enough capital.
- d. Differentiate between a simple and a compound sentence.

QUESTION FOUR:

- a. Define Connotation.
- b. Construct simple sentences connotatively using the following words:
 - i. Table ii. Snake iii. Apple iv. Red v. Pillar vi. Head vii. Woman
 - viii. Block ix. Home x. Man
- c. Use the following words denotatively in sentences:
 - i. Head ii. Star iii. Pillar iv. Table v. Red.

QUESTION FIVE:

- a. What is an essay?
- b. Write short notes on the four (4) types of essays.
- c. List any three (3) qualities of a good essay.

QUESTION SIX:

- a. Define Drama.
- b. Write short note on any three (3) of the following:
 - i. Comedy
 - ii. Tragedy
 - iii. Tragic-comedy
 - iv. Melodrama
 - v. Farce
- c. List any four (4) terminologies of drama.

THE FEDERAL POLYTECHNIC, MUBI
SCHOOL OF HUMANITIES AND CREATIVE ARTS TECHNOLOGY
DEPARTMENT OF LANGUAGES AND COMMUNICATION
2ND AND 4TH SEMESTER MAIN EXAMINATION, 2021/2022 ACADEMIC SESSION
5TH DECEMBER, 2022

COURSE TITLE: Use of English II
COURSE CODE: GNS 202

TIME ALLOWED: 2hrs 30mins

PROGRAMMES: ND II Purchasing & Supply, Computer Engr., Library & Inf. Science, Office Technology and Mgt., Business Administration Mgt., Quantity Survey, Agric Engr., URP, Mass Communication, Estate Mgt. & Valuation, Food Science Technology, SLT, Public Administration, Legal Studies, Survey, Nutrition & Dietetics, Geology & Mining, Fisheries, Arabic Studies, Electrical Engr., Co-operative Economics Mgt., Banking & Finance, and Computer Science.

Instruction: Answer ANY four (4) questions.

QUESTION ONE:

- Define writing for publication.
- Comment on the element of writing for publication.
- Mention five (5) techniques of writing for publication.

QUESTION TWO:

- Define register.
- List and explain factors influencing the use of register.
- Identify the field of discourse of the following terminology:
 - Battalion
 - Patient
 - Crop
 - Editor
 - Broadcasting
 - Farming
 - Quran
 - Trial
 - Tournament
 - Syllabus

QUESTION THREE:

- Differentiate between routine and special reports.
- List five (5) importance of report.
- Identify five (5) sources of information for report writing.

QUESTION FOUR:

- What is report?
- List any five (5) steps for writing a short report.
- Briefly explain the following terms in schematic report:
 - Abstract
 - Acknowledgment
 - Appendix

QUESTION FIVE:

- List the basic features of formal letter.
- In a tabular form compare and contrast the features of formal letter and memo.

QUESTION SIX:

Write an application for employment to an organization of your choice.

PROGRAMME: ND II CS **COURSE CODE:** COM221 **TIME:** 3hrs **COURSE TITLE:** Basic Computer Networking
INSTRUCTIONS: Answer ALL questions in Section A and any two questions from section B. CU: 3.0

SECTION A: Answer All [20 MKS]

1. Computer network is.....
A. Network computer with cable B. Network computer without cable C. None of the above. D. Both A and B.
2. An IPv6 address has a length of: A. 32 bits B. 128 bits C. 64 bits D. 128 bytes
3. What WLAN IEEE specification permits 2.4 GHz throughput of up to 54 Mbps?
A. N B. T C. A D. G
4. For the network on which the IP address 192.168.168.188 255.255.192 sits, which of the following is the valid host range?
A. 192.168.168.129-190 B. 192.168.168.129-191 C. 192.168.168.128-190 D. 192.168.168.128-192
5. What class does this IP address and subnet fall under? 192.168.168.188 255.255.255.192
A. Class D B. Class E C. Class B D. Class C
6. What is the CIDR of this IP address and subnet? 192.168.168.188 255.255.255.192
A. 28 B. 32 C. 26 D. 24
7. Where is a switch specified in the OSI model?
A. Session layer B. Physical layer C. Data Link layer D. Application layer
8. The routing table in networking occurs in which layer of the OSI model?
A. Layer One B. Layer Three C. Layer Five D. Layer Six
9. What protocol is used to return a message with an unknown destination network to the hosts that sent it?
A. TCP B. ICMP C. ARP D. BootP
10. What is the full meaning of this acronym? VLAN
A. Virtual Location Accurate Network B. Virtual Low area Network C. View Local Area Net D. Virtual Local Area Network.
11. What is the actual reason for the OSI Model?
A. Various networks could communicate. B. To build a more complex communication layer for networks. C. Routers can communicate with network devices. D. Only the switch device can communicate.
12. There are how many different kinds of physical network topologies?
A. Five B. Three C. Seven D. Six.
13. Which of the following network topologies best reflects the way that cables are used to link computers?
A. Logical B. Physical C. Both Logical and Physical D. None
14. Which topology combines two or more topologies?
A. Ring B. Hybrid C. Star D. Bus
15. What does this acronym, FTP, stand for?
A. File transfer protocol B. File transmission protocol C. Form transfer protocol D. Form transmission protocol.

16. Which of the following TCP/IP protocols is used for transferring files from one machine to another?
A. SNMP B. RPC C. FTP D. SMTP.

17. The term for the signal power loss as light moves down the fiber is...
A. Scattering B. Propagation C. Attenuation D. Interruption.

18. Which of the following communication channels permits two-way traffic but only in one direction at a time?
A. Simplex B. Full-Duplex C. Three-quarter duplex D. Half-Duplex

19. Datagram is found in which layer?
A. Layer Two B. Layer Five C. Layer One D. Layer Four

20. What is the name of the cable that transmits data messages as quickly as light and covers hundreds of miles far more quickly than conventional electrical connections?
A. Coaxial Cable B. Twisted Pair Cable C. Fiber Optic Cable D. None

Fill in the blanks in each of the following statements (10 Marks)

21. _____ is the cable that acts as a conducting shield by covering the four pairs of signals and carrying wires as a means to reduce electromagnetic interference?
22. _____ group of interconnected devices in a single physical space, like a home, business, or building. Is known as a _____.
23. A computer program or device that provides a service to another computer program and its user, also known as the client. Is called _____.
24. An organization that is responsible for providing internet service is called _____.
25. The physical and logical arrangement of nodes and connections in a network is referred to as _____.

Section B: Answer any two questions. (30 marks)

Question One

a. Show the table's default range for a classful address.

b. Calculate the network ID, subnet mask ID, and host ID of the IP address: 192.168.40.55/21. **7 ½ Marks**

Question Two

a. Enumerate eight differences between a wired and wireless network. **8 Marks**

b. Define network topology and briefly explain six (6) types of network topology. **7 Marks**

Question Three

a. Enumerate Six (6) differences between Dial-up and Broadband Connection. **6 Marks**

b. Briefly explain five (5) types of wireless network standards. **5 Marks**

c. What do the following acronyms stand for?

- i. HTTPS
- ii. MAC
- iii. HTML
- iv. URL

4 Mark

THE FEDERAL POLYTECHNIC MUBI
DEPARTMENT OF ELECTRICAL AND ELECTRONIC ENGINEERING TECHNOLOGY
END OF 2ND & 4TH SEMESTER EXAMINATION, 2021/2022 ACADEMIC SESSION
DECEMBER 2022

PROGRAM: ND II Computer Science

COURSE TITLE: Basic Hardware Maintenance

COURSE CODE: COM 223

TIME ALLOWED: 3 Hours

UNIT: 3

INSTRUCTION: Attempt any Five (5) Questions only. All question carries equal marks, Do not write on

the question paper.

QUESTION ONE

- a) With the aid of a well labelled diagram illustrate the water and current analogy, and briefly explain the main concepts in electricity. (14marks)
- b) State Ohms Laws? (6marks)

QUESTION TWO

- a) List four (4) uses of a resistor? (8marks)
- b) If resistors R_1 (Brown, Black, Orange and Gold), R_2 (Red, Red, Red and Gold) are connected in series' across a 9v battery. Calculate the following: - (9marks)
- The current in the circuit and
 - The power (3marks)

QUESTION THREE

- a) Briefly differentiate between Active and Passive electronic components with two examples each. (10marks)
- b) Define the followings Kirchhoff's Laws: - (5marks)
- Kirchhoff's voltage law (5marks)
 - Kirchhoff's current law (5marks)

QUESTION FOUR

- a) Define a Diode and give two types of Diodes you know? (8marks)
- b) List any three (3) types of Integrated circuit (IC) pin arrangement that you know? (6marks)
- c) Explain briefly an Oscilloscope? (6marks)

QUESTION FIVE

- a) Briefly define a capacitor? (5marks)
- b) Mention two types of polarized capacitors? (4marks)
- c) If two capacitors of capacitances $3\mu F$ and $4\mu F$ are connected in parallel and another capacitor of capacitance $5\mu F$ is connected in series. Find the total capacitance of the capacitors in the circuit? (11marks)

QUESTION SIX

- a) With a simple circuit diagrams briefly explain how to measure current and voltage drop across a resistor. (10marks)
- b) i. what is the value of current, if resistance is $0.1k\Omega$ and the voltage is 50V? (5marks)
- ii. How much resistance is needed to draw 4mA of current with 24V in the circuit? (5marks)

QUESTION SEVEN

- a) Briefly differentiate between preventive maintenance and corrective maintenance? (10marks)
- b) In precedence list the steps to be followed in troubleshooting a computer? (10marks)

DEPARTMENT OF COMPUTER SCIENCE
END OF 2ND AND 4TH SEMESTER EXAMINATION 2021/2022 SESSION

PROGRAMME: ND II COMPUTER SCIENCE

CU: 2.0

COURSE CODE: COM 224

COURSE TITLE: MANAGEMENT INFORMATION SYSTEM (MIS)

DURATION: 2 1/2 HOURS

INSTRUCTION: Attempt All questions from Section A and TWO (2) questions from Section B.

Section A: Select the right answer to each question from options A – D. (1 MARK EACH: TOTAL 30MARKS)

1. The following are types of Information system, except..... A) Transaction processing Systems
B) Information Reporting Systems C) Decision Support Systems D) Computer System
2. The following are main steps in planning a project, except..... A) Identify purpose of the project
B) Set objectives C) Gather information on resources D) Set results
3. Which of the following is NOT a type of system testing. A) Functional testing B) Recovery testing
C) Performance testing D) Debugging testing
4. Which of the following is Not a network topology..... A) Bus Topology B) Star Topology
C) Ring Topology D) LAN Topology
5. A system whose function and behavior is not affected by its environment, is called
A) Supersystem B) Open System C) Subsystem D) Closed System
6. is a technique where one single C.P.U interacts with many independent terminals given each of them individual attention on a time-slice basis. A) Decentralized Processing
B) Centralized Processing C) Batch Processing D) Time-Sharing Processing
7. is a technique where each location or branch has its data processing equipment and staff. Thus, processing activities are allowed to be carried out at each location or branch. A) Decentralized Processing B) Centralized Processing C) Batch Processing D) Time-Sharing Processing
8. The following are components of database system, except..... A) Relationship B) Data
C) Hardware D) Software
9. Communications at a distance is called..... A) Telecommunications B) Networking
C) Network D) Data communication
10. is the process of deciding on objectives of the organization, on changes in these objectives, on the resources used to attain these objectives. A) Strategic planning B) Managers planning
C) MIS planning D) Data planning
11. A piece or collection of raw facts representing people, objects, and the day-to-day activities of an enterprise, is called a..... A) Data B) Data Collection C) Information D) Raw facts
12. When a system is part of a larger system, is called A) Supersystem B) Open System
C) Subsystem D) Closed System
13. A system whose behavioral patterns can be predicted considering its present state and operation, is called a..... A) Mechanistic system B) Cybernetic system D) Stochastic system
D) Strategic system
14. is the movement of coded data and information from one point to another by means of electrical, or electromagnetic devices. A) Data communication B) Data Collection
C) Information D) Raw facts
15. The following are modes of acquisition of application software, except.....
~~A) Downloading~~ B) Purchase C) Interlocutory development D) Contracting out for system software
16. can be defined as the organization and mobilization of all human and material resources in a particular system for the achievement of identified objectives in the system.
A) Management B) Work force C) Committee D) Information system

17. involves regular processing of large amount of data that are piled up over a period of time before processing. A) Decentralized Processing B) Centralized Processing
C) Batch Processing D) Time-Sharing Processing
18. A is a computer-based structure for keeping records and maintaining the records to make it available to user on demand. A) Computer B) Project C) Database D) Model
19. is a system within a system. A) Supersystem B) Open System C) Subsystem D) Closed System
20. A system whose outcome cannot be predicted with precision, is called
A) Mechanistic system B) Cybernetic system C) Stochastic system D) Strategic system
21. is a language translator that converts programs from high level language to machine language. A) Programming B) Assembler C) Compiler D) Interpreting language
22. A is a group of interconnected computer systems sharing services and interacting by means of a share communications link. A) Telecommunications B) Networking C) Network D) Data communication
23. is a data that have been put into a meaningful and useful context and communicated to a recipient who uses it to make decisions. A) Data communication B) Data Collection
C) Information D) Raw facts
24. A system that interacts with other systems by exchanging input and output components with its environmental elements, is called A) Supersystem B) Open System C) Subsystem D) Closed System
25. is the language translator that converts programs written in assembly language to machine language. A) Programming B) Assembler C) Compiler D) Interpreting language
26. is a way of connecting more than one computer under the same or different operating environment, at different locations. A) Telecommunications B) Networking C) Network D) Data communication
27. A system that automatically adapts to its environments, is called A) Mechanistic system B) Cybernetic system C) Stochastic system D) Strategic system
28. facilitates moving files from one computer to another.
A) Internet B) File Transfer Protocol C) Telecommunications D) WAN
29. is a technique of processing where all processing functions or activities are done at a single or central location. A) Decentralized Processing B) Centralized Processing C) Batch Processing D) Time-Sharing Processing
30. A is a well-defined sequence of events with a beginning and an end, directed toward achieving a clear goal, and conducted by people within such established parameters as time, cost, resources, and quality. A) Computer B) Project C) Database D) Model

Section B: Answer Two (2) questions (30 MARKS)

Question One

- Different between data and information. 4marks
- Explain the three (3) types of system testing. 6marks
- List the Three (3) methods of data processing and explain anyone of them. 5marks

Question Two

- What do you understand by the term data communication? 3marks
- With the aid of diagram explain the following transmission modes:
i). Simplex, ii). Half-duplex, and iii). Full-duplex. 12marks

Question Three

- What do you understand by the term system model? 2marks
- List and explain four (4) types of models. 10marks
- State three (3) uses of models. 3marks

Course Title: File Organization and Management

Instructions: Answer Four (4) Questions Only (Each question carries equals Marks)

QUESTION ONE

- Define file organization and management?
- What does the term file extension refers to?
- List eight (8) types of file extension with their full meaning?

[4 Mark]
[3 Mark]
[8 Mark]

QUESTION TWO

- Define the following
File
Record
Database
File processing operation
- Briefly highlight and explain six (6) operations performed on a file?

[1.5 Mark]
[1.5 Mark]
[1.5 Mark]
[1.5 Mark]
[1.5 Mark]
[9 Mark]

QUESTION THREE

- Write short note on the following terms?
Data processing
Database processing
- Differentiate between file systems and file manager?
- Define data processing cycle and draw a well labeled diagram of data processing cycle?

[2 Mark]
[2 Mark]
[3 Mark]
[8 Mark]

QUESTION FOUR

- List and explain the classifications of file system?
- Briefly differentiate between the following file systems under windows?
 - File allocation table (FAT)
 - New technology file system (NTFS)
- Define file sharing and list six (6) qualities of a good filling system?

[6 Mark]
[3 Mark]
[6 Mark]

QUESTION FIVE

- Define file access method?
- Write short note on the follow file access methods
Sequential access method
Direct access (Relative, or Random)
Indexed sequential access method
Serial access method
- Highlight the simulation of sequential access on a direct access file in a tabular form?

[2 Mark]
[2 Mark]
[2 Mark]
[2 Mark]
[2 Mark]
[5 Mark]

QUESTION SIX

- List and explain four (4) types of files?
- Explain the capacity of computer storage with respect to;
Raw capacity;
Density;
- Draw a well labeled block diagram of a primary storage?

[2 Mark]

PROGRAMME: ND II CS COURSE TITLE: Web Technology. COURSE CODE: COM225 CU:3
INSTRUCTIONS: Answer All Question in SECTION A and any Two (2) Questions in SECTION B. TIME: 2hrs

SECTION A (1MARK EACH: TOTAL 30MARKS)

- Q1. _____ is an international network of networks of computers linking different types of users
Q2. All the computers use a communication standard called _____
Q3. The rule-making body of the Web is _____
Q4. HTML documents are plain-text folder created using any basic or high-level text editor. True/ False
Q5. <head> Acts as a container for _____ and _____
Q6. Between the opening and closing body tags is where you place the actual content you want displayed to the server. True/ False

- Q7. The text between the start and end tags is the _____
Q8. The
 tag is used when you want to _____
Q9. All html file must have the extension of _____
Q10. The comment tag is used to insert a comment in the HTML source code. True/False
Q11. To add spaces to your text, use the _____ character entity.
Q12. _____ is text, an image, or any other object in an HTML document that can be clicked in order to gain access to another web document.
Q13. HTML uses the _____ tag to create a link to another document.
Q14. With the _____ attribute, you can define where the linked document will be opened.
Q15. There are _____ steps needed to create an unordered list
Q16. Numbered lists are coded identical to an unnumbered list except for the opening and closing tag True/ False
Q17. Definition lists can be used for two purposes _____ and _____
Q18. The <body> tag has two attributes where you can specify backgrounds. The background can be _____ or _____
Q19. URL stands for _____
Q20. Web pages are built using _____
Q21. HTML colors is a hexadecimal notation for the combination of Red, Green, and Black True/False
Q22. Form elements include text fields, textarea fields, body, drop-down menus, radio buttons except _____
Q23. The input element has the following attributes except: i. type, ii. name, iii. Value and iv. action
Q24. Checkboxes are used when you want the user to select only one option of a limited number of choices. True/False
Q25. A table is divided into rows with the _____ tag, and each row is divided into data cells with the _____ tag.
Q26. The CSS syntax is made up of _____ parts

SECTION B (30MARKS)

- Q1a. Differentiates between a website and a web page (3 Marks)
Q1b. Every html document must have some basic tags. List these tags? (4 Marks)
Q1c. Write short note on the tags in Q1b above (8 Marks)

- Q2a. Write the html code that will produce the output below: (12 Marks)

NDII CS	HND CS	
ST/CS/ND 20/0901	Welcome to Com 225 Exams Hall	
Web Tech	is fun	- Item 1 - Item 2 - Item 3
	No content	

- Q2 b. What are the standard attributes of <form> element? (3 Marks)
Q3a. Write down the html code and a javascript that will display your registration number and welcome you to COM225 Exams on click event of an object (5 Marks)
Q3b. Explain the three (3) ways of inserting a style sheet to a web page and give example of each. (6 Marks)
Q3c. Differentiate between a checkbox and radio button on a single form. (4 Marks)
